Charred

Chargrilling is a culinary technique that involves cooking food directly over high heat on a grill, typically fueled by charcoal. The intense heat creates a sear on the surface of the food, characterised with a smoky aroma.

This process locks in juices, ensuring meat remains succulent and tender. The charring adds depth and complexity to the flavor of food, enhancing the overall dining experience.

Earle's Butter

Earle's compound butter is a mixture of softened butter combined with various aromatic ingredients. Our butter features the robust tang of Dijon Mustard, savory sweetness of Onion Balsamic, and the smoky richness of Roasted Pepper.

Butter will be flamed and served melted atop the steak, releasing a tantalizing aroma that adds a dimension to the flavor of the meat.
